

FALL 2026

CHE 499

Data Centers: Energy, Water and Society

**PROF. CHARLES ZUKOSKI AND
ALLISON AGSTEN**

The course is designed to provide an understanding of the hottest topic in the news: Data Centers. What are the engineering challenges and market forces driving growth? And what are the technical challenges and solutions to meet rising water and electricity demands? Instructor will answer those questions and teach students how to communicate about data centers in a variety of contexts.

**FRIDAYS
12PM - 3:30PM**

**LOCATION
VHE 214**

UNITS: 4
